

A close-up portrait of a Black man with a short beard and glasses, looking intently at a computer screen. The scene is dimly lit, with the primary light source being the screen, which casts a blue glow on his face and glasses. He is wearing a red t-shirt under a dark plaid shirt. The background is blurred, showing what appears to be a desk or office environment.

Border threats are increasing....

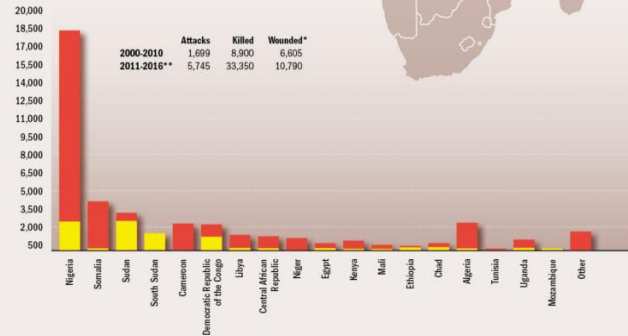

Where Terrorists Attack in Africa

Fatalities from Terrorist Attacks in Africa (2000-2016)

The size of the bubbles denotes the number of fatalities in a single attack, ranging from one to 400 during the period noted.

The largest single attack between 2000 to 2016 happened in Nigeria, committed by Boko Haram in January 2015.

Number of fatalities/location of attacks resulting in fatalities
● Attacks by groups associated with religious ideologies
● Attacks by other groups

*Number wounded in 2015 and 2016 not included. **Up to February 2016
Sources: Global Terrorism Database, University of Maryland (2000-2014), and Armed Conflict Location and Event Data Project (2015-2016)

...putting border agencies under tremendous pressure.

They need to **maintain national security** without creating barriers for **legitimate travelers**.

And they are expected to do more with less...

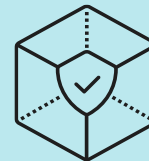

Keeping up with changing rules

Responding to mass migration/displacement

Stopping organized crime

The future of Borders is smart, safe, and
seamless

The United Nations recommends **reliable identification** and **risk assessments** of travelers.

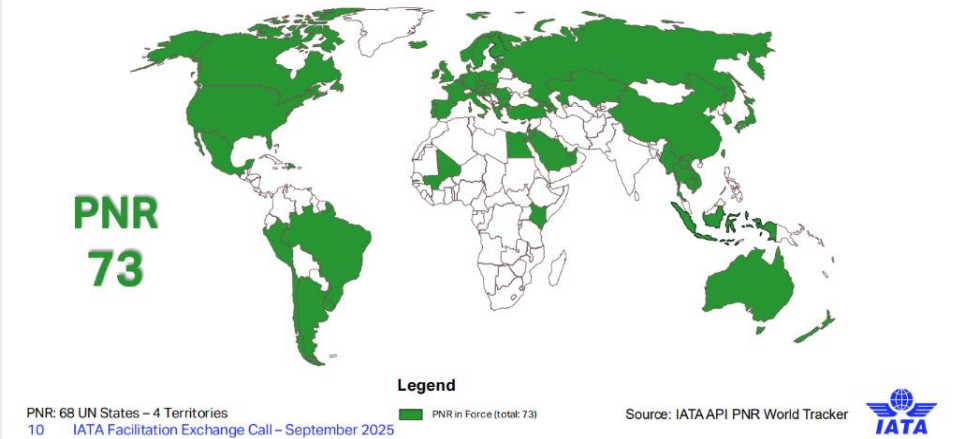

The **EU urges** states through its directives to collect pre-flight data.

...and global industry bodies are moving from recommendations to mandates – across air, land, and sea.

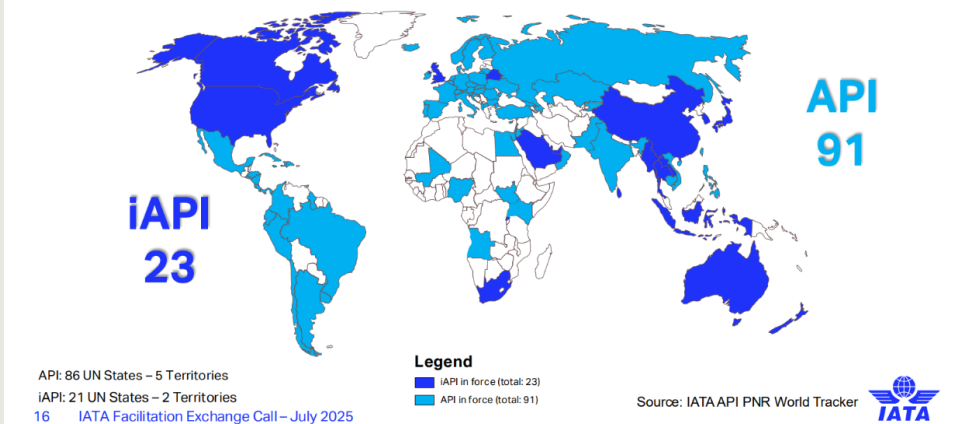

But the adoption of
traveler data is low...

Global PNR Implementation Status

Global API / iAPI Implementation Status

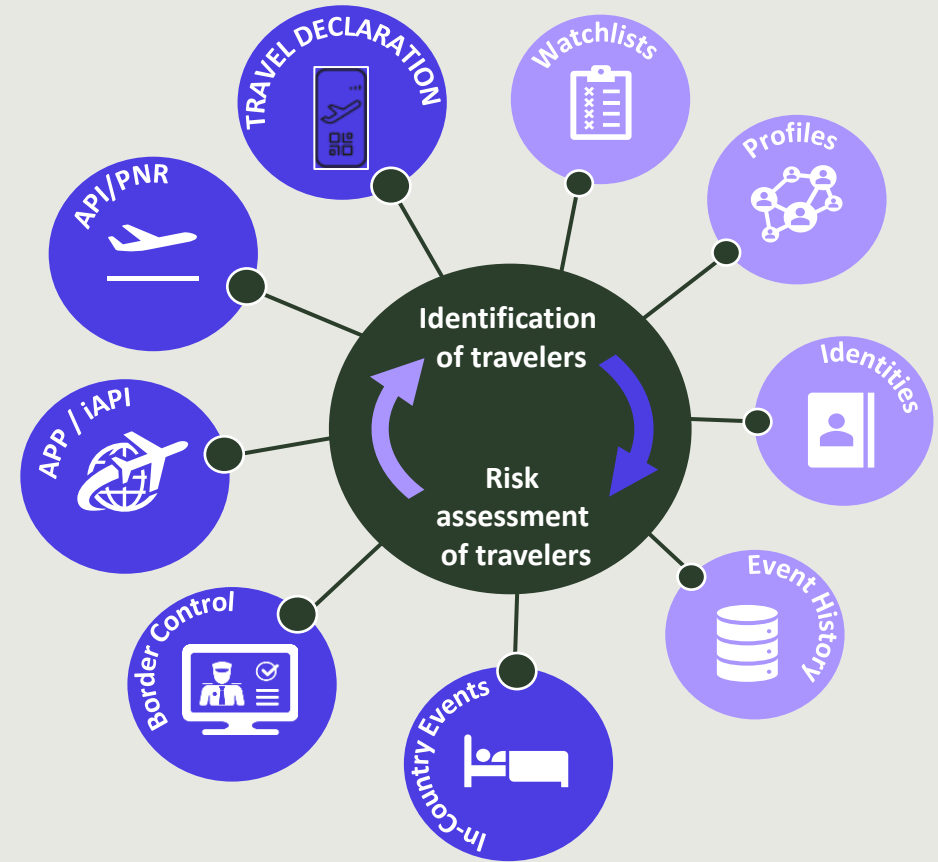

Beyond passenger data

Borders security is only as strong as the information behind it.

Multiple data sources, when accurate and shared through **inter-agency cooperation**, break down silos and create one clear picture.

A centralized approach turns scattered insights into smart decisions, keeping **nations safe** while making travel and trade easier.

The power of balancing facilitation and security

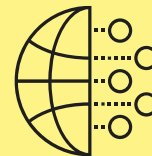

Safer borders

- Threats stopped before they enter

Faster travel

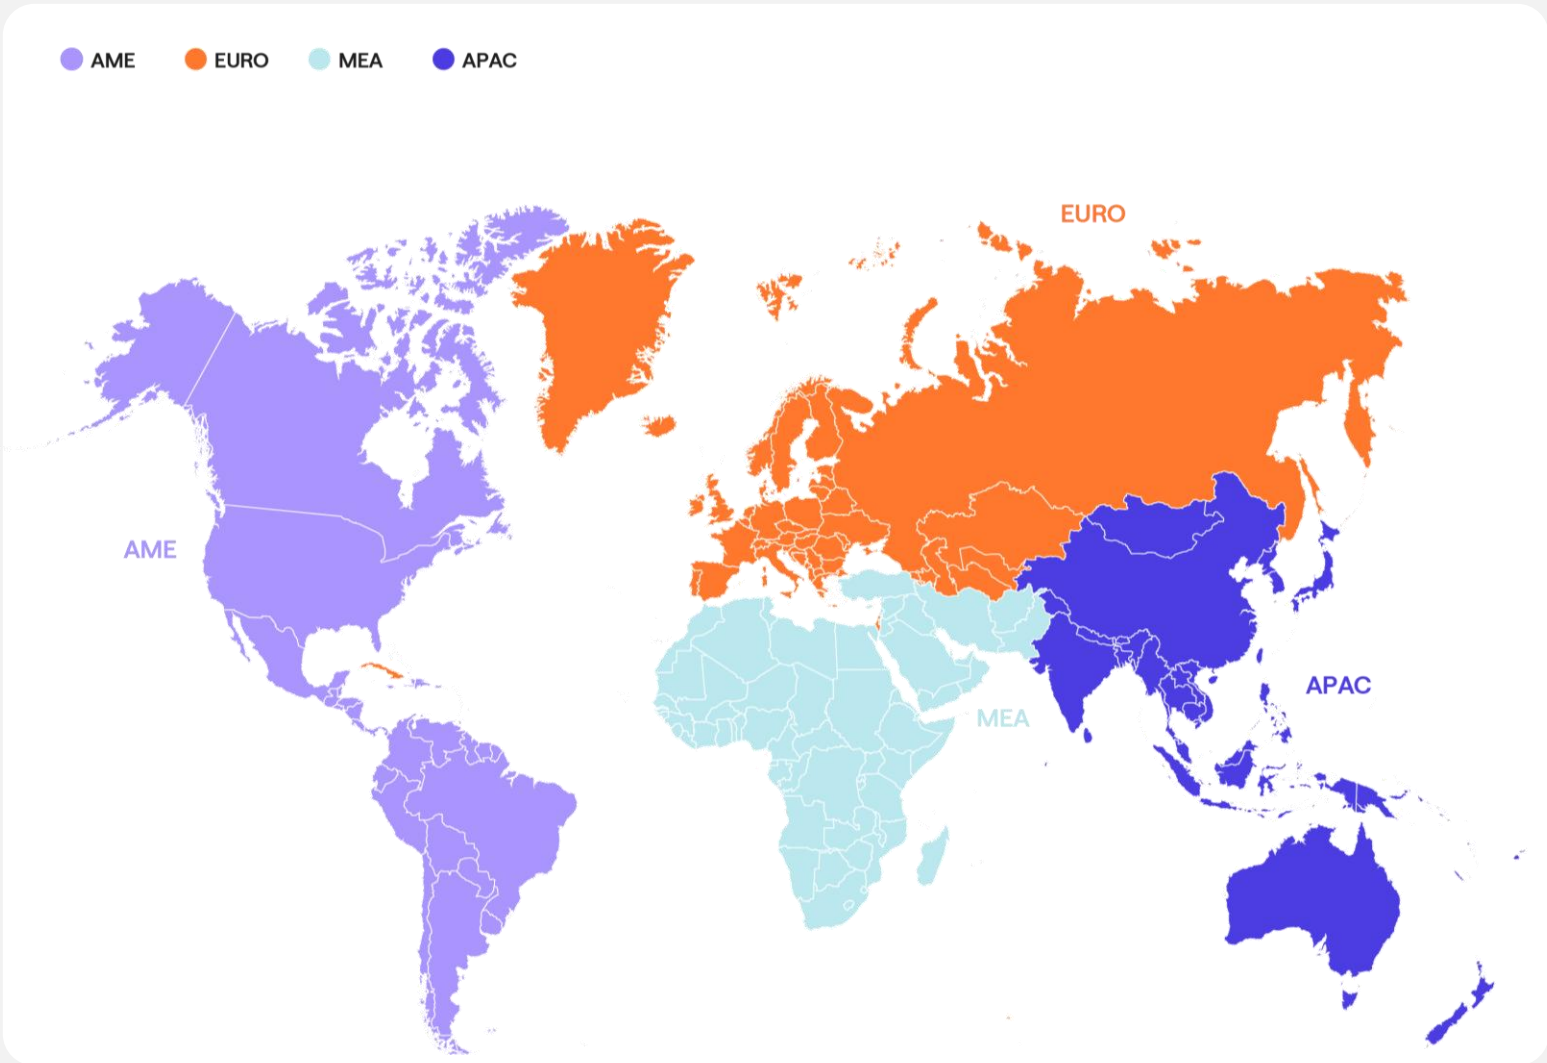

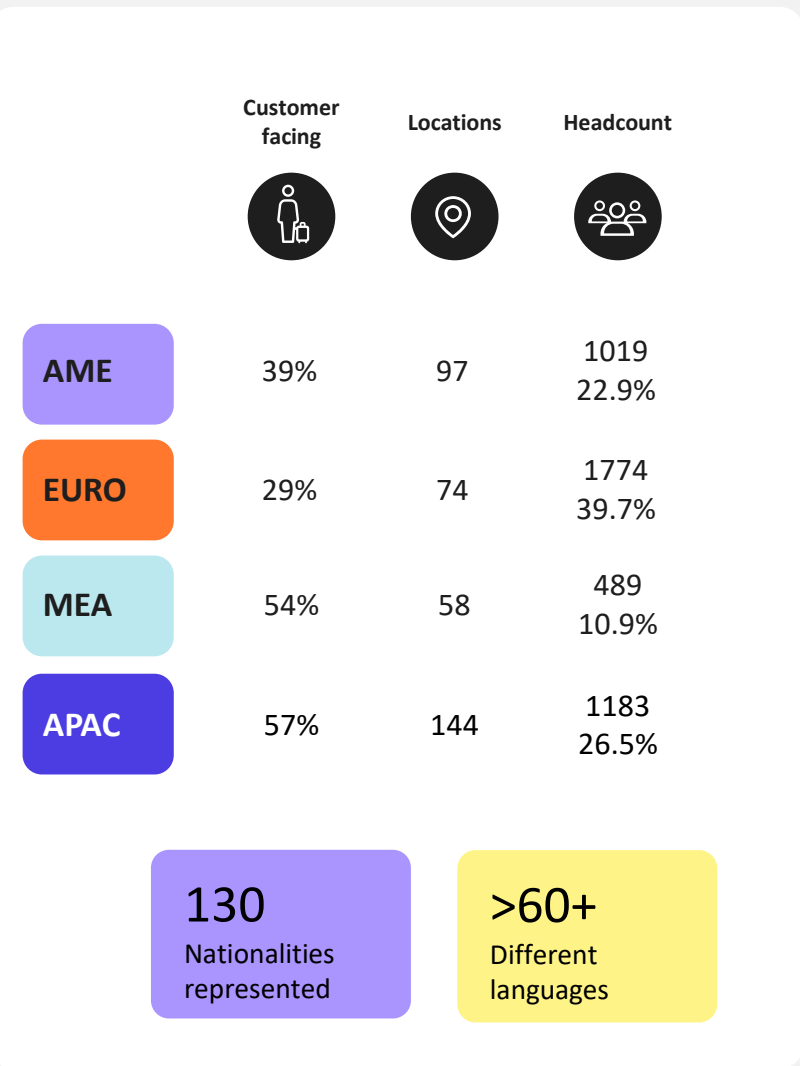

- Smooth, seamless movement for legitimate passengers

Trust in aviation & tourism

- Supporting economic growth, investment, jobs

We deliver services in around 200 countries and territories

Delivering the Digital Borders of the future, today
